## Olarm APP

The power to manage & control:

- Alarm systems
- Electric fences
- Gates & doors
- And more...

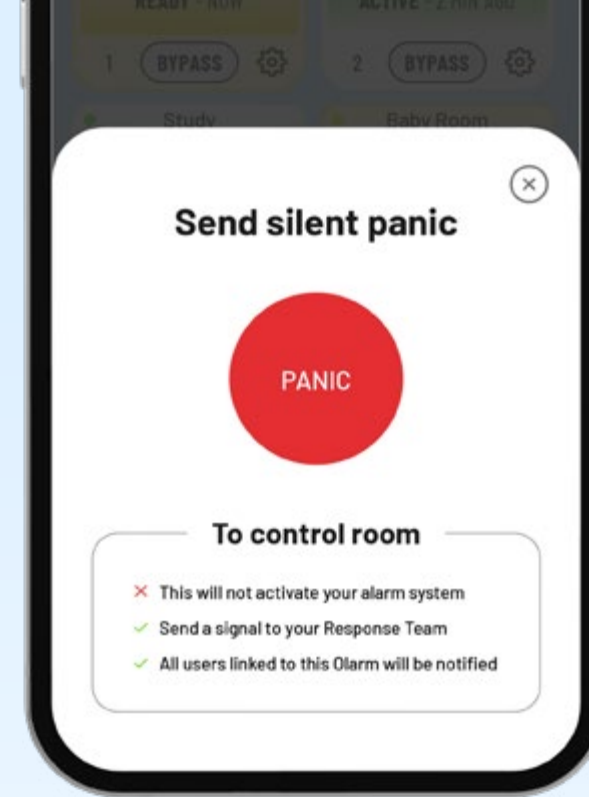

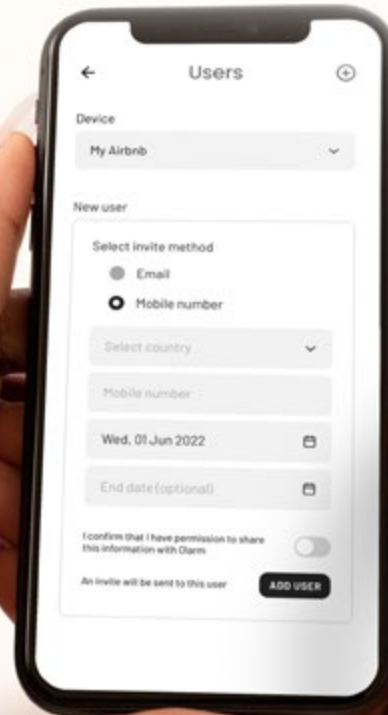

# Manage access whenever & wherever

## Remote user management

No need for in-person presence. Remotely authorise and set access control. Full user visibility and history.

## Time-based access

No unwanted users. Access can be set to automatically start and expire on any date.

## Push notifications

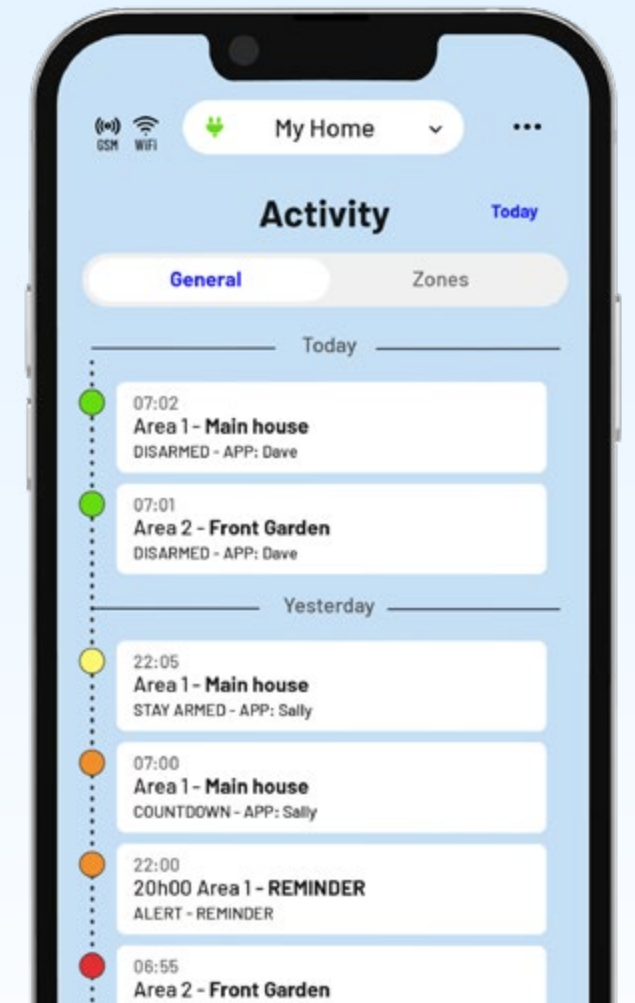

No more SMS. Making security monitoring more convenient, efficient and effective.

## Auditable incident records

No more guessing. Real-time status updates allow users to quickly identify activity and effectively respond. Logged history provides detailed audit trail.

## Silent panic always to hand

No need for separate panic devices. Olarm instantly notifies the response team and all linked users.

# Smart enabled alarm systems

- Plug-and-play
- Integrates with most leading alarm panels
- Transfers Contact ID signals directly to Control Rooms
- Mobile app

"Olarm is a great choice for your home or business security solution. It's affordable, easy to use and reliable."

- Popular Mechanics

# Olarm PRO

## Olarm PRO

## Olarm APP

# Smart enabled electric fences

Get all the benefits of Olarm PRO communicator on selected Nemtek electric fence energizers.

AC Fail & battery low

Bypass faulty zones

Set fence voltage

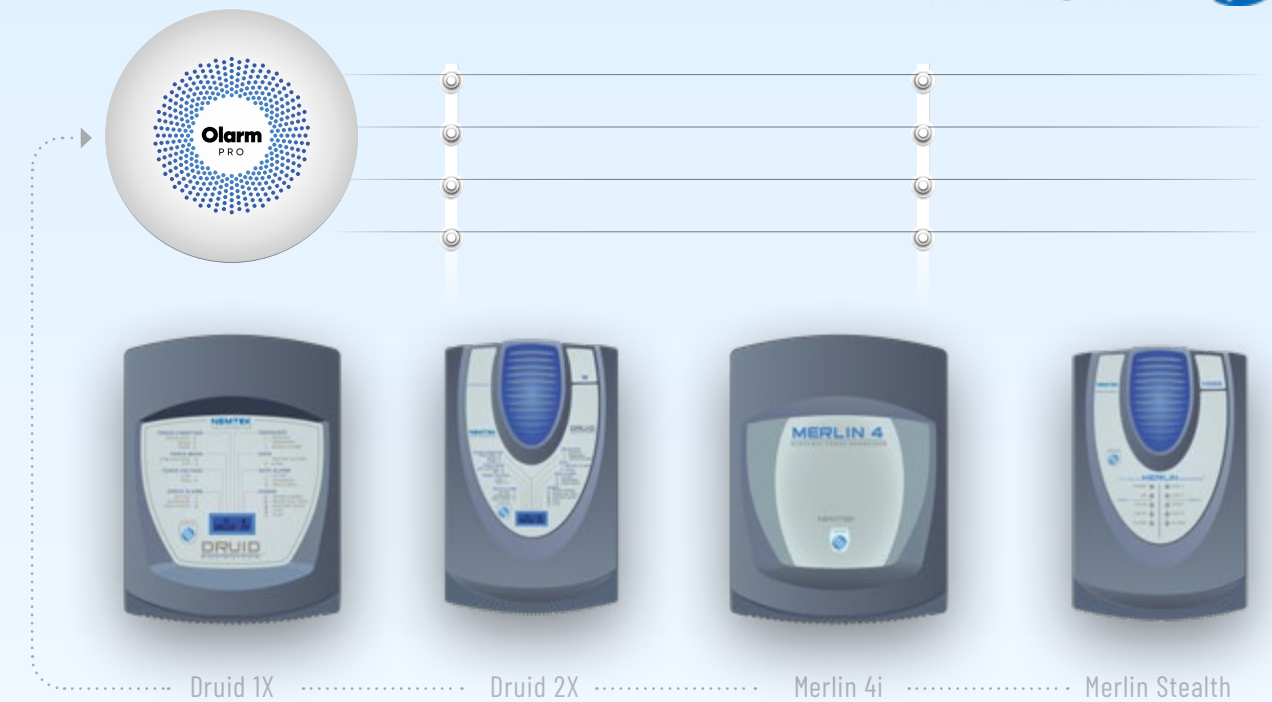

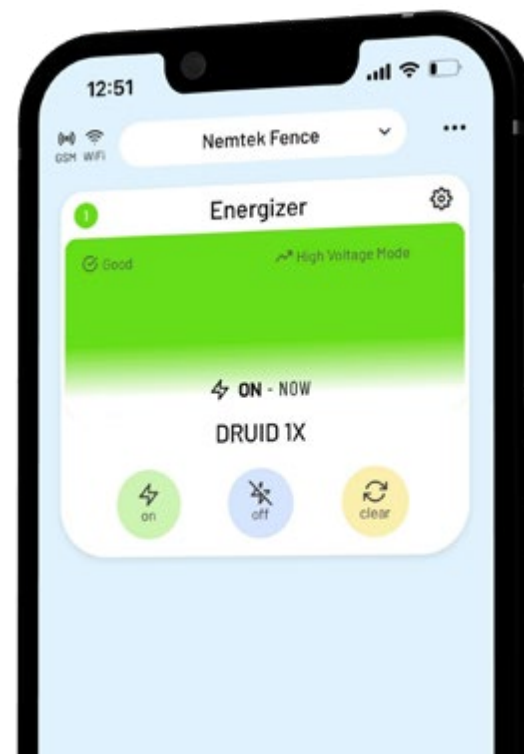

Turn fence ON / OFF

Live Event log

Live signals monitoring

## Improve perimeter security

As your first line of defence, get your security company to monitor the fence with live signals to their control room.

## Easier maintenance

Maintaining an electric fence can be a time-consuming job. Remotely turn the fence on or off.

## Know your fence status

Manage and monitor your fence right from your phone. With live alarm alerts, battery health condition and service status.

## Quick & simple installation

Installing the Olarm PRO takes minutes with one cable which plugs into the Nemtek energizer.

# Smart integration with Olarm LINK

- Seamlessly integrates a wide range of everyday systems
- Full remote control enables real-time status monitoring
- Robust connectivity built-in
- Easy installation

Pumps

Lights

Gates

Doors

Boom gates

And more...

## Product Specs

6x I/O ports .....  
12 - 24VDC input power .....  
4 - 20 mA sensor input .....  
2x 240 VAC 10A relays .....  
0 - 10V sensor input .....  
DIN rail clip .....

## Example statuses

..... Open / Close  
..... Battery fail  
..... Tamper

..... On or Off  
..... Mains power fail

**Olarm LINK**

# Triple layered redundancy & stability

- Additional WiFi channel provides 50% more redundancy
- Built-in connectivity with Olarm-managed SIM cards and network
- Highly reliable industry-leading infrastructure
- Global network coverage

# A seamless customer to Control Room experience

## Olarm Command Centre

Olarm Command Centre is a web-based alarm signals & incident management platform. It is purpose-built for residential estate control rooms, community & neighbourhood watches, or the deployment of large enterprise-level distributed teams.

# Signals monitoring & reaction

Now with just a tablet/computer, internet connection and Olarm Command Centre platform, control room operators can spend less on managing complex systems and more time keeping their customers safe.

**Hardware Required:**  
Standard computer with internet  
connection and Google Chrome installed.

Supports Leading  
alarm brands

Signals monitoring  
with live map

Event logging &  
audit trail

Device  
management

User & Team  
management

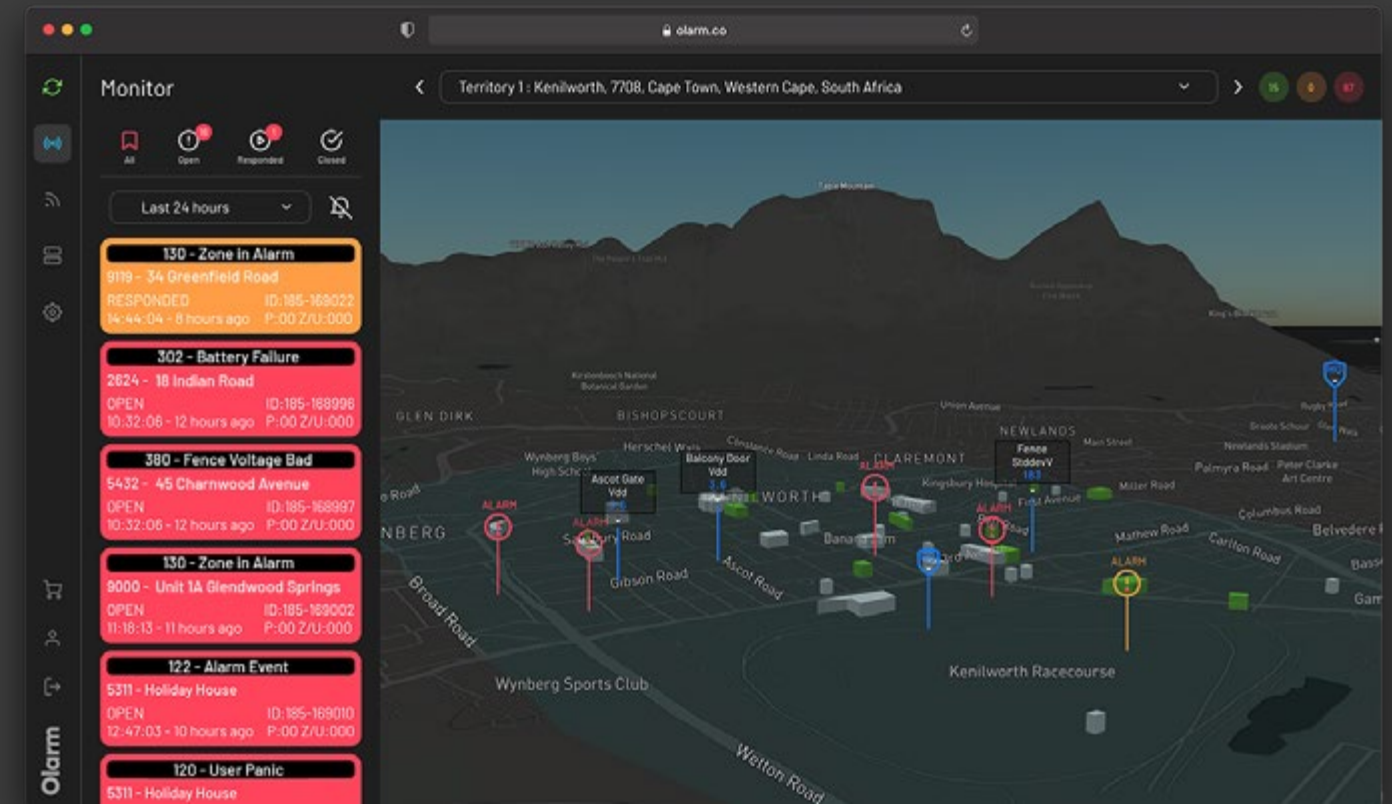

Custom branding  
for customer app

Automatic software  
updates

Ongoing 24/7  
support

# Boost efficiency & operational performance

From installation, to monitoring and maintenance, Olarm's value chain of easy-to-use products provide an unfair advantage in an increasingly competitive security market.

## Improved service delivery

Removing user-generated alarms from the Control Room and Response team frees up the teams to respond to actual events.

## Reduces unnecessary noise

Fewer phone calls mean less noise, administration and more cost savings in the Control Room. Allowing teams to focus on actual alarms.

## Better customer experience

In-app, customer-controlled features tend to improve the experience as the customer can respond and avoid phone calls. (especially after hours!)

# Partner with us

The Olarm Partner Programme seeks to foster long-lasting relationships with Resellers, Installers and Monitoring & Reaction companies so that we can build our businesses together by delivering value to your customers.

New client leads

Partner training & resources

Assigned Partner Manager

Olarm website listing

Preferential reseller pricing

Ongoing 24/7 support

## Monitoring & Reaction

Designed for Armed Response and security companies.

## Reseller

For businesses who resell Olarm products.

## Master Distributor

International distribution partners who service resellers in non South African territories.

## Installer

Perfect for accredited companies who install Olarm devices either for consumers and/or on behalf of Armed Response companies.

## Integrator

An accredited business that integrates with Olarm at a systems level, providing additional value through hardware, software and product integrations.
